Hi Eugene,

Yes, there is new data from the new permit (see attachment). I listed the monthly and quarterly for 002, Produced Waters. Produced Water has data reported, however, all data reported for 003 are NODI(C). You may want to refer to the attachment which Jay Rao provides us. It may have the 003 composition data or produced water mixed with discharge 003. I have the latest attachment if you need them.

Sandra,

Thanks

I have some questions.

- 1) The data appear to be from the previous (2004-2009) permit. Any data from the new permit – effective March 1, 2014?

- 2) Also we're looking for 2014 discharge volume data for:
  - produced water alone (002)
  - produced water mixed with discharge 003 (if any), including the volume of 002 and 003 separately.
  - discharge 003 alone (if any)
- 3) Discharge 003 composition data (if any)

I'm not sure if NetDMR accommodates this sort of info.

Hi Eugene,

Attach is a spreadsheet with the quarterly reporting for 002. Most of the reported data are NODI(B), "Below Detection Limit/No Detection." All the 003 have reported NODI(C), "No discharge."

**Subject:** NetDMR data

Sandra,

The Center of Biological Diversity is asking about DMR data received under the new OCS oil and gas general permit – specifically for discharge 003 (well treatment, completion and workover fluids).

Can you check to see if any of the platforms submitting NetDMRs have submitted any info for discharge 003 for DMRs covering quarterly periods beginning March 1, 2014 or later?

Discharge 003 might also be reported as being combined with discharge 002 (produced water) – so need to check if discharge 003 fluids may have been discharged with 002.

Thanks
